**Representing MEA Local/Region:** MEA Resolutions Committee

### **Text of proposal:**

The Michigan Education Association believes that the legal rights of education employees injured on the job must be protected. The Association also believes that workers' compensation programs must address both the physical and psychological impacts of workplace injuries.

The Association encourages its locals to protect the rights of injured members and provide access to information regarding employment-related injuries.

### **Rationale:**

The Michigan Education Association's Resolutions document does not adequately address employees injured on the job. The above language was adopted by the National Education Association at the 2025 RA.
